EXPERIENCE

Self Employed – Programming Tutor

Dec 2021

- Providing customers with knowledge about the best practices of HTML CSS, Responsive design, Flexbox, JavaScript and React
- Clarified customers how to debug using Google Chrome inspect element tooling
- Taught and simplified difficult programming concepts including CSS Box Model, layout responsive website development, API requests.

Freelance – Frontend developer

Mar 2022 - Current

- Engineered responsive, scalable, multi-platform, and user-friendly websites utilizing HTML5, CSS3, JavaScript, React best practices
- Communicated business requirements with customers and provided high quality solutions

PROJECTS

MovieSharks

<https://sensational-kitten-8540b7.netlify.app/>

- Designed, developed with ReactJS, best practices and using the Movie DB API
- Installed responsive and multi-platform support to enable the website to be viewed on any platform and device
- Implemented functionality like sorting by rating or release data, displaying more information about movie, dynamically generated pages

Matix Bike

<https://cheerful-dasik-84bd4d.netlify.app/> - temporary link

- Website made for the client, currently waiting for a client response.
- Developed with React JS and technologies like react-router, framer-motion (pages animations)
- Dynamically generated products. Also website performance improved by compressing the images
- Included responsive and multi-platform support to make their website prepared for displaying on any type of device.
